

## Karlshamn

🇸🇪 Sweden

📍 Latitude: 56.157283 | Longitude: 14.820168

Our caverns and tanks are directly linked to Karlshamn Port's well-managed facilities. A good depth of 12.5 metres and close proximity to the Baltic States, Poland and Germany makes Karlshamn attractive from several perspectives. The main storage products are Gas Oil, Fuel Oil and VGO.

### **Total storage capacity**
